

Shanmukha Vishnu Vardan Melam

Data Analyst | Business Analyst | Power BI Developer | SQL Developer

+91-9951153592 · vishnu.melam09@gmail.com · linkedin.com/in/vishnumelam · github.com/vishnumelam

SUMMARY

Aspiring Data Analyst with hands-on experience in Power BI, SQL, Advanced Excel, and Python for data analysis, business intelligence, and dashboard development. Skilled in transforming large datasets into actionable insights using Power BI, DAX, Power Query, SQL, and data visualization techniques. Strong foundation in statistics, data modeling, KPI development, and business reporting. Passionate about solving business problems through data-driven decision making.

TECHNICAL SKILLS

Languages: Python, SQL

Analytics & BI: Power BI (DAX, Power Query, Data Modelling), Advanced Excel

Data & Analysis: NumPy, Pandas, Data Preprocessing, Model Training & Evaluation

Backend: Flask, Django, REST API Development

Frontend: React.js, HTML5, CSS3

Databases: MongoDB, MySQL

Tools & Platforms: Power BI Desktop, Jupyter Notebook, MS Excel, GitHub

Core Concepts: Data Dashboard Development, Data Visualization, Data Cleaning, Statistics

PROJECTS

HR Analytics Dashboard | Power BI, Excel

Mar 2026 – May 2026

Tech Stack: Power BI, Excel | **GitHub:** github.com/vishnumelam/hr-analytics

- Designed and developed an end-to-end HR Analytics Dashboard using Power BI. Processed and analyzed over 22,000 employee records to generate workforce insights.
- Developed KPIs including Employee Count, Attrition Ratio, Remote Workforce %, HQ Workforce %, and Average Employee Age using DAX.
- Created interactive dashboards to analyze employee demographics by gender, race, department, state, and job role.
- Performed workforce trend analysis to identify hiring and retention patterns. Used Power Query for ETL and DAX for advanced calculations.

Market Analysis Dashboard | Power BI & SQL

Jan 2026 – Feb 2026

Tech Stack: Power BI, SQL | **GitHub:** github.com/vishnumelam/market-analysis

- Built an interactive Market Analysis Dashboard analyzing 63,000 customers and 100,000 orders. Integrated five datasets using relational data modeling in Power BI..
- Segmented customers into New, Regular, and Loyal groups using purchase behavior. Designed interactive visualizations including donut charts, bar charts, and KPI cards.
- Identified that Loyal customers represented only 16% of users while contributing the highest number of orders.
